

## Accelerated Transformations

Accelerated Transformations is a technology professional development and consulting firm. Accelerated Transformations, led by **Teneika Askew, an Agile and Analytics leader** with over 9 years' experience in the professional services and technology industry. Teneika has created over 11 insight-driven organizations through delivery of self-service analytic solutions powered by enterprise data warehouses. Her strengths are in performing complex analytics to identify and understand processes, gaps, and transactions to answer difficult to solve problems.

## TENEIKA ASKEW

Teneika has experience creating and delivering data analytics training and curriculum for clients in federal, commercial, and non-profit spaces. She leverages Power BI, Tableau and Python to create innovative data-driven insights using organizational data and trains colleagues and students with open data made available through the DATA Act, with the goal of providing agencies and the public with new and interesting ways to benefit from expanding their knowledge in the data analytics and science communities.

### TRAINING

Understand or grow your data literacy through extensive Tableau, Power BI, SQL, or Excel trainings that provide the ability to explore, understand and communicate data driven insights. You will work in a collaborative environment, learning how to proficiently gather, cleanse and analyze data to create visuals in Power BI, Excel, and Tableau.

### ASSESSMENT

Learn how data and analytics can be utilized to support your enterprise data strategy, while optimizing your business for automated reporting, self-service analytics, accurate data reporting, and comprehensive reporting of all data sources. You will be equipped for future innovation, performance, and growth.

### VISUALIZATION

Leveraging the 4-step Design Thinking iterative process of Define, Prototype, Build and Deploy, we'll partner to ensure your visuals are meeting the business and technical requirements, proving out the value of data engineering and advanced analytics.

### INNOVATION

Collaborate hand-in-hand to uncover the art of the possible in an interactive discovery workshop where our leading data & analytics experts focus on uncovering both the business needs as well as the technical skill sets of each user group within the organization. You will receive a tailored Analytics Roadmap.
